ProofMover

Better Manage Workflow.

Ensure the right people review and approve art, on time. Assign personnel and due dates to review a file, and ProofMover will send an e-mail with a direct link to the files you want reviewed. You can schedule regular reviews or recurring tasks by day, week, month, and year. Proofing sessions can be launched directly from each reminder e-mail, and notification of a successful review are automatically sent to the project owner.

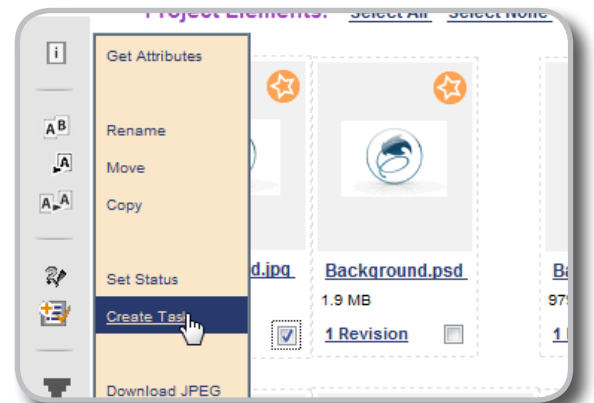

Collaborate and Proof Online.

You can host collaborative online sessions with colleagues from around the world. ProofMover allows you to control and direct the discussion, and use a variety of annotation, zoom and pan, and ruler and guide tools to proof artwork. You can then collect everyone's comments and edits into a single, easy to read report.

Upload and View Any File, Any Time.

ProofMover uses a resolution-on-demand system that allows you to quickly upload and download large files; no more long download times.
